

# Prevent Bites:

## Protect Your Workers in the Field

Postal and utility employees are at a higher risk for animal bites because of their work in the field, especially entering people's yards. Don't let this happen to your employees. Bites can be prevented!

The Lake County Health Department/Community Health Center's Animal Care and Control Program offers free bite prevention educational programming for Lake County employers. The programs can help your employees prevent animal related injuries and bites while they're doing their job in the field.

If you would like more information on scheduling a bite prevention program for your employees, please contact the Lake County Health Department's Animal Care and Control Program at (847) 377-4700.
